FIXING & SETUP GUIDELINE

INSTALLATION GUIDELINES

- Doors can be cut on all the sides up to 8.00mm per side. Trimming should be done on both sides equally.
- Subsequent to trimming all sides should be primed or sealed with wood sealant and must be applied immediately.
- Bottom of the door must be painted / polished before installation of the door is done. •Hinges must be aligned before fitting the door, to avoid bending. It is recommended that you fix two hinges in the upper portion on the door with a gap of 6 inches from each other and by leaving a gap of 12 inches from the top, for the first hinges. The rest of the hinges should be placed equal distance in the rest of the door length.
- We will not be held liable for any of the damages due to the wind or any external forces. •If the doors are trimmed more than 8.00mm in width or height from any side the manufacturing warranty shall be void and Nexcore shall not be responsible for the same.
- 3mm space between the frame and door must be provided on all sides of the door shutter. This is to accommodate minor movements of the door frames.

STORAGE GUIDELINES

- Store flat on a level surface in a clean, dry, well ventilated building. Protect from dirt, water and abuse. Allow air circulation. Cover the top door with a moisture barrier.
- Doors should not be subjected to abnormal or sudden variations in heat, dryness or humidity, and should not be exposed to direct sunlight.

DISCLAIMER:

Company's liability is limited to replacement / repair of its product only and no other cost will be reimbursed of whatsoever nature by us.
